

HOSE BANDAGE

CANVAS, CONVENTIONAL

Hose Bandages are used as a temporary means for stopping leaks in Delivery hoses during Firefighting operations. They can be quickly tied over the leaking hose, thus preventing further damage to the hose, and possible bursting. A string of suitable length allows tying of the bandage over the leakage area.

Brief Description : AAAG Hose Bandage, Conventional design, made of Canvas material, having suitable arrangement for wrapping/binding the bandage around the hose for stopping leakages in firefighting delivery hose during firefighting operations. Bandage can be used to wrap around hoses of 63 mm diameter.
