

FIXED INLINE INDUCTOR

SS304, 65 NB SIZE

Fixed Inline Inductors are used in fixed foam systems for inducing the correct amount of foam concentrate into the water stream. For correct operation, the Inductor flow and pressure must be matched to the discharge devices such as Foam Chambers, Foam Pourers or Spray nozzles

Brief Description : AAAG Fixed Inline Inductor, made of SS304, Flow range – 200 to 500 lpm, Inlet-Outlet size 65 NB, flanges as per ANSI 16.5 150# (or as per request), with suitable size Foam compound inlet for specified induction rate. Inline Inductors shall have hydraulically efficient design, with maximum pressure drop across inductor not exceeding 35%.
